PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on experience building and deploying full-stack web applications using React, Node.js, Express, and MongoDB. Delivered multiple live, production-ready projects covering e-commerce, business websites, and productivity tools, with a strong focus on responsive UI and clean code. Comfortable integrating AI-assisted development tools (GitHub Copilot, Cursor AI, Claude AI) into a fast, modern workflow. Eager to contribute as a Software Developer / Frontend / Full Stack Developer in a growth-focused engineering team.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering

2022 - 2026

Narayana Engineering College, Gudur | CGPA: 8.5 / 10

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3

Frontend: React.js, Responsive Web Design, REST API Integration

Backend: Node.js, Express.js

Database: MongoDB, SQL

Tools: Git, GitHub, VS Code, Postman

AI Development Tools: ChatGPT, Claude AI, Cursor AI, GitHub Copilot

Core CS Concepts: DBMS, OOP, Data Structures, Operating Systems, Computer Networks, Software Engineering

PROJECTS

ShopHub - E-Commerce Web Application

- Built a responsive e-commerce web application with a dynamic product catalog, category filtering, and product detail views using React and modern JavaScript.
- Implemented a smooth shopping cart and checkout flow, focusing on intuitive navigation and consistent UI across mobile and desktop breakpoints.
- Optimized component rendering and asset loading to improve page performance and overall user experience.

Jolly Cabs - Transportation Booking Platform

- Developed a fully responsive business website for a transportation service, showcasing service offerings, pricing, and contact details.
- Designed an intuitive booking inquiry interface enabling users to request rides directly through the site.
- Ensured cross-device consistency and fast load times through mobile-first responsive design practices.

TaskFlow - Productivity & Task Management Platform

- Built a task management web app supporting full CRUD operations for creating, updating, and tracking tasks.
- Designed a clean dashboard UI to visualize task status and productivity progress at a glance.
- Implemented client-side local storage for persistent task data without requiring a backend.

SecureAuth Pay - Authentication & Payment Platform

- Designed a secure user authentication system with login and registration flows backed by JWT-based session handling.
- Built RESTful APIs with Node.js and Express to manage user data and transaction records stored in MongoDB.
- Implemented payment integration workflows with attention to secure handling of transaction data.

CERTIFICATIONS

- NPTEL Certification - Computer Science and Engineering
- MotionCut Virtual Internship
- EliteTech Virtual Internship
- IndStack Virtual Internship

ACHIEVEMENTS

- Built and deployed multiple full-stack web applications, taking each from development through to live production hosting.
- Maintained an active GitHub portfolio showcasing project code, structure, and version history.
- Delivered responsive, cross-device websites for portfolio and client-style use cases.
- Adopted AI-assisted development workflows (GitHub Copilot, Cursor AI, Claude AI) to accelerate coding and debugging.

SOFT SKILLS

Problem Solving • Communication • Team Collaboration • Adaptability • Quick Learning • Time Management
